

Patient Photography Guide

Friend or family member can assist you

Stand in a well-lit area

Avoid using Camera Flash

STEP

1

GENERAL AREA PHOTO:

- Take a photo of the general area from a distance (so we can identify where on the body the lesion is located)

STEP

2

CLOSE-UP PHOTO:

- Take a close-up photo of the lesion from approximately 10cm distance
- Ensure photo remains in focus and is not blurred
- **Size of the lesion:** place a coin or a ruler next to the lesion in the photo
